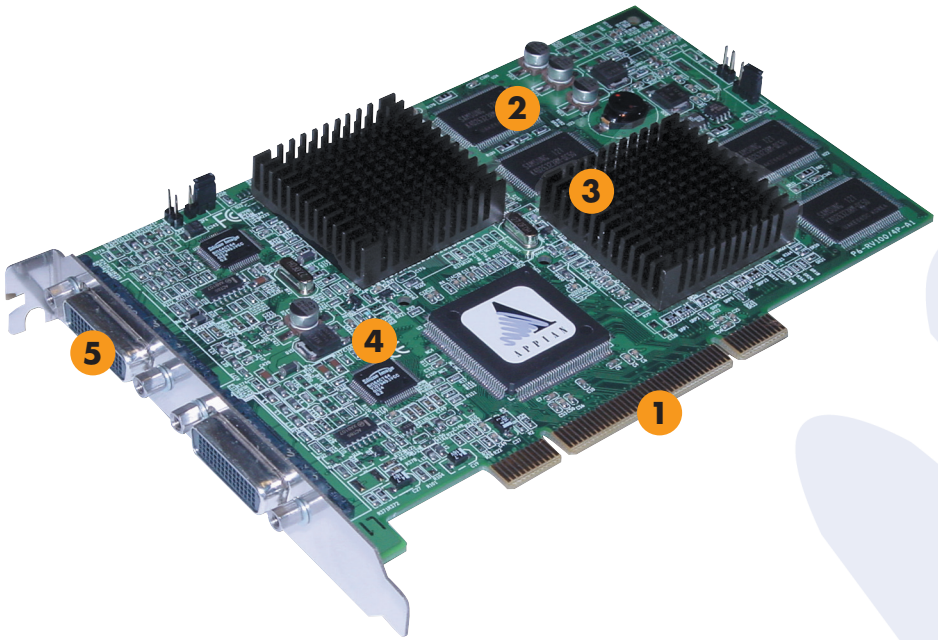
APPIAN RUSHMORE™

Appian's most powerful Xtended Desktop Solution



1. Extend your desktop from one PCI slot
2. Up to 64 MB DDR SDRAM
3. Two ATI Radeon VE multi-display graphics accelerators
4. DirectX®, DirectDraw™, Direct3D™ and OpenGL® support across displays
5. Integrated DVI support

Big ideas need room.
The Appian Rushmore™ is a workstation-performance graphics card designed for bankers, traders, video editors and anyone else who needs an extended-desktop solution.

The complete extended desktop solution.
Appian provides it all: high-performance graphics cards, time-saving HydraVision™ software and worldwide support. Only Appian offers AppianXtras™—a suite of multi-display specialty tools which allow you to see more and do more.

Don't sacrifice slot space.
The Appian Rushmore allows you to power up to four displays from a single slot, leaving you room for other professional hardware. Two ATI Radeon VE multi-monitor graphics accelerators offer impressive 2D and 3D capabilities.

Full Windows® compatibility.
The ATI Radeon VE graphics accelerator is ideal for the latest Windows operating systems, including support for all new Windows 2000 display features and special GDI extension accelerations such as Alpha BLTs, Transparent BLTs and Gradient Fills.

Powerful desktop management.
Appian's HydraVision software lets you define the placement of windows and dialog boxes to manage information across your extended desktop. Hot key shortcuts and other time-saving features help you work more productively.

Recognized leader.
Because Appian is the leading provider of extended desktop solutions, major PC manufacturers like Compaq, Dell, Hewlett-Packard and IBM offer Appian solutions to their customers.

The Appian Rushmore has integrated DVI support, so you can connect up to four digital or analog displays to your system using a single slot.

THE LEADER IN
Xtended
Desktop Solutions

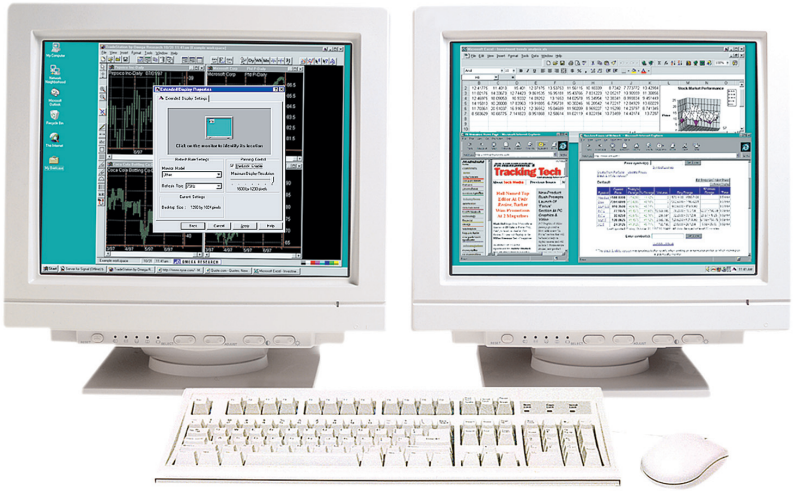
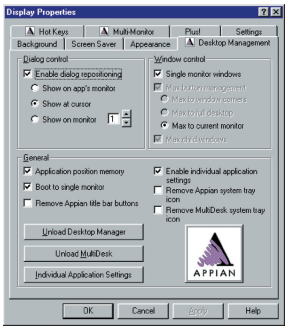
APPIAN RUSHMORE™

The Appian Rushmore™ is just one of Appian's Xtended Desktop Solutions.



Appian Rushmore Technology Benefits

- Two ATI Radeon VE graphics accelerators with integrated 10 bit 300 MHz RAMDACs and independent display engines provide impressive 2D and 3D acceleration across multiple displays
- Support for hardware accelerated DirectX and OpenGL
- PCI bus interface
- DDC support gives you plug-and-play power
- Includes HydraVision software for quick and easy extended desktop management
- Supports many different resolutions and refresh rates per display including wide-screen aspect ratios and individual monitor portrait modes using AppianRotate.
- Multi-board support provides up to 16 monitors under Windows NT 4.0 on a single platform.



Appian's HydraVision software allows you to arrange application windows anywhere you want across displays. You can change resolutions, control message placement, arrange your desktop and more.

Specifications

Resolution and maximum refresh rates (Hz)

	Color bit depth		
	32 bpp	16 bpp	8 bpp
2048 x 1536	60	60	60
1920 x 1440	75	75	75
1920 x 1200	90	90	90
1920 x 1080	90	90	90
1600 x 1200	100	100	100
1280 x 1024	120	120	120
1152 x 864	160	160	160
1024 x 768	200	200	200
800 x 600	200	200	200
640 x 480	200	200	200

Video

- Hardware accelerated DirectX across multiple monitors with AppianDX
- Hardware accelerated OpenGL across multiple monitors with HydraThread

Memory

- Up to 64MB DDR SDRAM

Software Support

- Windows 98, ME, NT 4.0, 2000 and XP
- DirectX, Direct3D, DirectDraw and Open GL
- Multi-board support

System Requirements

- x86 host compliant with PCI spec 2.2+
- x86 host compliant with AGP spec 2.0+
